- Tools & Platforms: GitHub, VS Code
- Core Competencies: Analytical Thinking, Problem Solving, Data-Driven Decision Making

EXPERIENCE

Data Analytics Industrial Internship

01/2026 – 06/2026

Eagletfly Solutions Pvt Ltd.

New Delhi

- Analyzed and transformed business data using SQL, Python (Pandas), and Excel to support reporting and decision-making.
- Designed interactive Power BI dashboards for KPI tracking, trend analysis, and performance monitoring.
- Wrote SQL queries for data extraction, cleaning, aggregation, and reporting from business datasets.
- Leveraged Python and Pandas for data preprocessing, data analysis, and workflow automation.
- Created visual reports and dashboards to identify trends, measure performance, and generate actionable insights.
- Assisted in delivering business intelligence solutions that improved reporting efficiency and data visibility.

FEATURED PROJECTS

LV Analytics Dashboard – Retail Domain [Power BI] 🔗

- Built an interactive business intelligence dashboard to track 15+ core business KPIs, enabling senior stakeholders to perform real-time trend analysis. - Leveraged DAX and data storytelling to highlight underperforming product lines, identifying a 12% revenue leakage in quarterly sales.

Pokémon Analytics Dashboard – Entertainment Domain [Excel] 🔗

- Developed a dynamic Excel dashboard utilizing Pivot Tables, Slicers, and Charts to analyze a dataset of 800+ data points. - Engineered automated KPI cards and conditional formatting that streamlined data navigation, reducing manual filtering time by 35%.

SQL Sales Analysis Project – E-Commerce Domain [MySQL] 🔗

- Performed an in-depth sales analysis by writing optimized MySQL queries to process over 50K+ transaction records. - Generated data-driven business reports that identified an 18% drop in seasonal customer retention, directly aiding the team's marketing strategy.
